***Reasons for Allowance***

The following is an examiner's statement of reasons for allowance:

The most relevant art of record are the disclosures of Rosch *et al.* (US 6,115,847 A and US 5,876,394). These references teach boxer type undergarments which feature absorbent inner crotch liners featuring an elasticized thigh opening which resides above the lower leg opening of the article. However, the references fail to teach a diaper of conventional construction including two legs attached to thigh openings of central portions, each said leg comprises a rectangular panel having a front edge, a rear edge an inner edge joined to the central portion and a bottom end adapted to form leg opening. Instead, the references teach outer leg portions which are attached directly to the outer waist band, not to the inner thigh opening.

Other relevant art includes panty hose or sportswear with some of the physical features of the instant invention (Brisco US 5,136,727 A; Safrit US 3,678,514). These references are not diapers or incontinence garments designed to hold a considerable amount of fluid. At most, the can absorb a small amount of perspiration. One of ordinary skill in the art would not be motivated to add spill preventing front and rear waist arches as taught by Valentin *et al.* (USPAP 2002/0183706 A1) to these garments which do not hold much liquid.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
